GTA Proactively Prepares for Tropical Depression 29W

(Tamuning, Guam) Thursday, October 15, 2026 - With Tropical Depression 29W forecast to move closer to Guam this weekend, GTA is taking early steps to prepare its network, facilities, and response teams to help protect critical infrastructure and maintain connectivity for our customers.

Preparedness is part of GTA's ongoing commitment to network resilience. Whenever a storm threatens Guam, our teams take proactive measures that include inspecting network facilities, checking backup power systems, fueling generators and service vehicles, securing equipment and construction areas, and positioning recovery resources ahead of potential impacts. GTA's Network Operations Center will remain fully staffed to monitor network conditions and coordinate response efforts as needed.

GTA continues to invest in network resilience through expanded generator capacity, backup power systems, and hardened cable facilities. While these measures help strengthen service reliability, disruptions may still occur depending on storm conditions, commercial power availability, and potential infrastructure damage.

Customers are encouraged to charge mobile devices, prepare backup power sources if available, and monitor local media, Guam Homeland Security announcements, and GTA's official communication channels for updates.
GTA will continue to monitor the storm's progress and share information as conditions evolve.

UPDATE as of 5:00 PM, 10/15

About GTA

GTA is Guam's leading telecommunications provider, delivering advanced connectivity solutions for residential, business, and government customers across the island. GTA's services include high-speed fiber internet, 5G wireless mobility, and advanced voice and data services for business and carrier customers that support critical infrastructure, enterprise operations, and everyday communications.

GTA operates secure, locally managed data center facilities on Guam and plays a key role in the island's digital ecosystem through its ownership and operation of Guam's first locally owned cable landing station and data center in Piti. GTA operates four data centers—GU1, GU2, and GU3 on Guam, and HMB IX in Hermosa Beach, California. Together with its subsea cable investments and extensive network infrastructure, these facilities strengthen Guam's position as a strategic digital gateway in the Pacific while supporting reliable, resilient connectivity for the community.

Based in Tamuning, Guam, GTA is a U.S.-owned, locally managed company with nearly 75 years of service to Guam and a long-standing commitment to advancing the island's digital future.
