WeTransfer proudly presents 'Arisen my Senses', the new video from Björk's ninth studio album [Utopia](#). The video is exclusively available on WeTransfer for 48 hours.

The video features a moving sculpture created by director Jesse Kanda - a pearlescent white amalgam of amniotic sack, mating slugs, phallus, and blood red mouths. Initially sculpted in digital form and brought to life in silicone, it depicts the cycle of death, mating, and birth as one.

Read the full story about the slug costumes on [WeTransfer](#).
