

AcceptEmail opens for business in Germany, Austria and Switzerland

AcceptEmail has opened a new office in Germany. With this step the company is increasing its footprint across Europe.

AcceptEmail is the creator of dynamic email and mobile billing solutions that help people pay their household bills on the go in less than 30 seconds. Companies that send AcceptEmails experience up to 50% quicker payments, 70% lower billing and reminder costs, and 20% improved customer satisfaction (net promoter scores). The company is the market leader for consumer remittances in Western Europe, with customers as T-Mobile, Vodafone, Telefónica Germany, Santander, ING, OTTO, RWE, BMW, GFKL and many more. Johan Zevenhuizen is responsible for driving strategic business deals and partnerships across various industries in DACH.

Pay your household bills on the go in less than 30 seconds."

— Johan Zevenhuizen, Country Manager AcceptEmail DACH

“There are many ways to pay your bills for home utilities, phone subscriptions or rent but most of them are too much hassle for customers. Click-through rates on notification mails are low and paper bills become less popular. Results show that people who receive AcceptEmails pay their bills up to 50% faster because all possible hurdles are removed. One click to initiate the payment and the bill is paid with real-time payment updates right there in the email.

AcceptEmail makes paying bills easier, so companies get paid twice as fast.” Johan Zevenhuizen said.

AcceptEmail supports various payment methods such as credit cards (Visa, Mastercard, Amex), debit cards (V Pay, Maestro) and e-payment systems, such as giropay, PayPal, SOFORT, etc. The Software-as-a-Service has integrated with over 110 payment service providers (PSPs) / payment gateways, including Wirecard, Worldline and EVO.

ABOUT ACCEPTEMAIL

[AcceptEmail](#) is the easiest way to receive and pay bills and reminders for consumers and SMEs. Rather than a notification to log in to a biller portal, customers receive real-time payment requests via various messaging solutions: email, mobile, QR or social media. In a few clicks, bills can be paid directly from the inbox, using online or mobile payment methods. No manual data (re)entry is involved, and the customer does not need to register or log in. Customers experience more convenience, with fewer steps to take and with real-time updates that show the current status of the bill in the message itself.

AcceptEmail is the market leader for consumer remittances in Western Europe, serving approximately 600 clients. IntelligentHQ.com named the company one of [Europe's 50 Hottest FinTech Companies](#) in 2014. Headquartered in Amsterdam, AcceptEmail has offices in Belgium, Germany, the UK, and New York.
