SoundCloud Rolls Out New DJ Software Integration with Virtual DJ

April 9, 2019, New York, NY -- Today, [SoundCloud](#), the world's largest open audio platform, is giving its DJ community another way to take their workflow to the next level with the launch of a new DJ performance software integration with Virtual DJ. The integration enables creators to instantly stream and mix SoundCloud's massive catalog of original tracks in high-quality audio using a SoundCloud Go+ premium consumer subscription.

Get started building mixes with Virtual DJ

- Download and log into [Virtual DJ 8](#) online.
- Enable SoundCloud within Virtual DJ 8, then log in using a SoundCloud Go+ premium subscription username and password.
- Restart the Virtual DJ 8 application to begin accessing saved SoundCloud playlists, and to search, mix and stream from SoundCloud's massive catalog, live.

Don't have a SoundCloud Go+ subscription?

SoundCloud Go+ gives listeners access to more than 200 million tracks from more than 20 million creators around the world, with offline sync, no advertising, and high-quality audio streaming.

There are three ways to access SoundCloud's premium consumer subscription:

- Purchase a standalone SoundCloud Go+ subscription for \$9.99/€9.99 per month. Visit soundcloud.com/go for details.
- If you're a college or university student, visit checkout.soundcloud.com/student on web to purchase SoundCloud Go+ at the discounted price of \$4.99/€4.99 per month.

- **Best value for DJs:** Purchase SoundCloud Pro Unlimited, SoundCloud's premium creator subscription, and DJs can add a SoundCloud Go+ subscription for just \$4.99, giving them the leading hosting tools for DJs and the world's largest streaming catalog for a bundled price of \$16.99/month. To take advantage of this offer and learn more, DJs can visit creators.soundcloud.com/dj.

SoundCloud Go+ is available through SoundCloud's existing apps on the iOS App Store, Google Play or by visiting soundcloud.com/go.

Today's news comes on the heels of SoundCloud's first DJ performance software launch with [Serato in December 2018](#). Stay tuned for additional launches with DEX3, Native Instruments, Mixvibes and Hercules coming later this year.
