Over FIBER

FIBER is an Amsterdam based interdisciplinary organisation presenting new developments in audiovisual art, digital culture and the experimental and deeper corners of electronic music. The team works year round with a vibrant network of artists, designers, researchers and developers, who aspire to introduce mind bending experiences to a broad audience. Special attention goes out to the support of up and coming talents across numerous creative disciplines.

Futures of Listening is a new Netherlands based platform supporting emerging developments in spatial sound, immersive experiences, performance, and installation art. Founded by FIBER Festival, 4DSOUND, Robin Koek, and Art of Sound at the Royal Conservatoire The Hague, the initiative connects artists with a broad network of artistic, scientific, and cultural partners.
