Purition Chocolate Orange returns for the festive season

The healthier way to enjoy chocolate this Christmas

A healthier alternative at an indulgent time of year, Purition Chocolate Orange contains 100% real food you can drink and absolutely nothing else.

Purition brings together indulgent all-natural dark chocolate cocoa, with the delicate and tangy citrus zing that only natural orange can provide.

Like others in the Purition range, the new Chocolate Orange flavour contains no artificial ingredients, and is made with a blend of all-natural seeds and nuts and vegetarian proteins.

A small, nutritional meal in a glass made in just 30 seconds, Purition Chocolate Orange offers convenient nutrition to support healthy eating goals and is packed with protein, healthy fats and fibre.

Low in sugar and starchy carbs and certified gluten free, Purition Chocolate Orange provides the decadent flavours of the festive season, without compromising on nutritional value.

Limited Edition Chocolate Orange is available in both Original and Vegan. A 500g pouch, which includes approximately 12 servings, is available from £16.65 at www.purition.co.uk while stocks last.

Other delicious flavours in the Purition range include Macadamia & Vanilla, Chocolate, Coconut, Strawberry, Pistachio and the new improved Almond flavour, now made with roasted Californian almonds. All Purition's products are made with 100% natural ingredients.

About Purition

Purition is passionate about the importance of eating real food for health and wellness.

It is dedicated to using the freshest, highest quality ingredients sourced responsibly.

Purition meals can be prepared in seconds helping to take the hassle out of healthy eating without compromising real ingredients for the sake of convenience or profit.

The recipes are based on nutritious nuts and seeds, ground, mixed and chopped in the company HQ in Shropshire, UK.

The British owned and operated company is committed to reducing food miles, unnecessary plastic and food waste. Over 75% of the ingredients are grown in Europe and since 2018, it has reduced the amount of unnecessary plastic use by 388kg.
