# Eindhoven Airport first Dutch regional airport with ISO certificate

Eindhoven, 14 may 2003

**Today, Eindhoven Airport has received the official certificate ISO 14001 for her environmental policy and protection. This makes the airport the first regional airport in The Netherlands working according to ISO standards regarding environmental planning.**

Eindhoven Airport considers the environmental protection and care for the surroundings as important preconditions to execute the company's activities.

To enforce this thought one has worked hard to set up its own Environmental Policy Plan. The basis for this plan are the international ISO 14001 standards.

With this certified environmental policy EindhovenAirport does have an important and effective instrument to take care of a continuous improvement of her environmental performances and to be alert on the environmental impact of civil aviation for the surroundings, now and in the future.

CEO of the airport is very pleased about obtaining the certificate and considers it as a rewarded effort.

*"Obtaining the certificate is an important milestone in the professional care and attention Eindhoven Airport gives to the surroundings and the environment and is a confirmation of her durable and well-considered company's policy"*

— Bart de Boer, CEO Eindhoven Airport N.V.

## ABOUT EINDHOVEN AIRPORT

Eindhoven Airport, with over 4 million passengers in 2015 the second largest airport in the Netherlands, boosts the business climate in the south of the Netherlands and is crucial to the

region in achieving its ambitions. The airport is aiming for a broad portfolio of destinations. Flights depart from Eindhoven Airport to over 70 destinations. Speed and the total airport experience are its added values. Eindhoven Airport connects Brainport to Europe in particular and makes the region internationally accessible. With 1500 direct jobs the airport has grown into one of the region's largest employers. According to the agreements between national and regional stakeholders, Eindhoven Airport will have the space to grow to some 5.5 million passengers in 2020. The growth will be achieved with the support of the local community and within the frameworks of the Alders Opinion and the Dutch government's Air Travel Policy Document. Eindhoven Airport pursues an integrated policy for growth, the environment and sustainability.
