

Rocket Internet SE: Uplisting to Prime Standard

23 SEPTEMBER 2016, BERLIN

SUMMARY

● *Rocket Internet has applied for admission to trading on the regulated market (Prime Standard) of the Frankfurt Stock Exchange // ● Trading of Rocket Internet's shares on the regulated market is expected to commence around September 27, 2016*

Rocket Internet SE (“Rocket Internet”, “the Company”) announces today that it has applied for admission of its shares to trading on the regulated market (Prime Standard) of the Frankfurt Stock Exchange. Trading of Rocket Internet's shares on the regulated market is expected to commence around September 27, 2016.

“The uplisting has been an important goal for Rocket Internet and underscores our efforts to comply with the capital markets best practices”, says Oliver Samwer, CEO Rocket Internet.

Since Rocket Internet's IPO in October 2014, the Company's shares were listed on the non-regulated market (Entry Standard) of the Frankfurt Stock Exchange. The Company changed its accounting standards to International Financial Reporting Standards (IFRS) last year, which is a key requirement for a Prime Standard listing.

ABOUT ROCKET INTERNET

Our Mission

Rocket Internet builds and invests in Internet companies that take proven online business models to new, fast-growing markets. Rocket Internet focuses on five industry sectors of online and mobile retail services that make up a significant share of consumer spending: Food & Groceries, Fashion, General Merchandise, Home & Living

and Travel. Its network of companies conducts business in a large number of countries around the globe with more than 36,000 employees at the end of 2015. Rocket Internet SE is listed on the Frankfurt Stock Exchange (ISIN DE000A12UKK6, RKET). For further information visit www.rocket-internet.com.

Our Focus

Our e-commerce companies include retail companies in the areas of fashion, general merchandise, home and living, office supplies and food and groceries. Our marketplace companies seek to displace traditional supply chains by creating venues where buyers and sellers can transact directly, and include real estate and car online classifieds, travel and transport, and food delivery companies. Our third sector, financial technology, includes companies that focus on bringing together borrowers and lenders in regions and segments that are underserved by traditional banks, particularly in the consumer and small and medium-sized enterprise segments, and on facilitating payments. Our travel companies seize opportunities in the rapidly growing online travel and transport sector. They focus currently on vacation packages and online travel booking.

Our Strategy

As part of our global strategy, we have created regional Internet groups in Africa, Asia Pacific and the Middle East in order to bundle local market and business model insights, facilitate regional commercial, strategic and investment partnerships, in particular with mobile telecommunication providers, enable local recruiting and sourcing and accelerate the regional rollout of our companies. We have developed proprietary technology where we believe it provides our companies with a competitive advantage. Our proprietary technology is highly flexible and scalable and provides our companies with significant cost and speed advantages, particularly during their initial rapid launch and rollout processes.

Our Platform

Our platform has enabled us to build a large, global network of companies and has historically put us in a position to launch more than 10 new companies every year through application of a standardized business model identification and development process. Every new company that we start accelerates the virtuous circle of synergy creation among our companies. The larger the size of our network of companies, the more significant our opportunity is to benefit from synergies and network effects with respect to our suppliers, solution providers, customers and employees.
