

# Lima named as 2015 CES Innovation Awards Honoree in two categories

**Info** New York, USA | Published on: November 12, 2014

**Details** Lima announced today that it was awarded the prize of “Innovation Honoree” at the 2015 CES Innovation Awards in two categories: Software and Mobile Apps and Computer Accessories. Products entered into the CES Innovation Awards are judged by a preeminent panel of independent industrial designers, independent engineers and members of the trade media to honor outstanding design and engineering in cutting edge consumer electronics products across 28 product categories.

Made up of a hardware adapter and a multi-platform app, Lima enables users to have exactly the same files on their smartphone, computer and tablet regardless of their OS or storage capacity. Lima’s app upgrades the filesystem of your devices to change the way they manage your files. All your devices store automatically your data at home, on a hard drive connected to the Lima adapter. Because they all share the same storage, your devices now show exactly the same files and folders.

The benefit for the user is having his entire digital life with him, on all of his devices, without any constraints. Thanks to the direct integration of the software into the OS, the user no longer needs to transfer his files or upload them to the Cloud to access them on multiple devices.

Lima was originally launched on Kickstarter, where it achieved its funding goal in only 12 hours and went on to raise over \$1.2 million.

Lima will be on display at the 2015 International CES, which runs Jan. 6-9, 2015, in Las Vegas, Nevada.

Entries of the prestigious CES Innovation are evaluated on their engineering, aesthetic and design qualities, intended use/function and user value, how the design and innovation of the product directly compares to other products in the marketplace and unique/novel features present.

Products chosen as CES Innovation Honorees reflect innovative design and engineering in some of the most cutting edge tech products and services coming to market.
