Gandi named the "Registrar with the highest potential" at the Domain Name Industry Conference in China.

French registrar recognized by CNNIC, registry for .CN, for its engagement in the Asian market.

25 JANUARY 2016, GUANGZHOU, CHINA

Summary

Just one year after obtaining direct accreditation by the Chinese registry, Gandi is receiving praise for the excellence of its Chinese-language customer service and its commitment to helping individuals and companies in the Chinese market build their online presence.

Since launching its Asian offices in 2014, domain name registrar Gandi has been busy integrating relevant regional currencies, adding support in traditional and simplified Chinese scripts and recruiting a solid Chinese-speaking team in order to assure a customer experience adapted to the particularities of the Asian domain name market with Gandi's high standards.

The Taipei-based team has been engaged in the region with the local community (attending conferences in China, Taiwan, and Japan) and even organized the first ever hackathon dedicated to a geographic TLD, (.TAIPEI) in December 2015.

For Stephan Ramoin, CEO of Gandi, "Our selection for this award from among a crop of largely Asian competitors shows our conviction to taking root in this market and growing along with it."

With over 16 million domain names registered, the .CN extension is already the most-used geographic extension in the world, just behind .de (Germany). In recognizing a European company, CNNIC is demonstrating its intention to develop an open, dynamic market in a space once reserved exclusively for Chinese companies.

About Gandi US

Founded in March of 2000, Gandi has grown to become one of the primary sellers of domain names in the world, with over 1.5 million domain names under management. Gandi provides individuals the opportunity to personalize their piece of the Internet, while offering domain name and hosting solutions to small businesses, large companies and institutions. Besides its function as a domain registrar, Gandi is a leading SSL Certification Authority, managing nearly 15,000 certificates.

With its expertise in domain names, Gandi expanded its offering to public cloud hosting in 2008, and now supports more than 20,000 hosting customers, representing more than 100,000 sites. With both Simple Hosting, a PaaS service designed for SMEs and individuals, and a high-performance IaaS service, Gandi offers a range of options to suit the needs of its various customers.

Gandi's hosting options combine the power of virtual private servers with high flexibility and optimal data security on a truly innovative network and server architecture.

Gandi is an innovative company, offering services "for geeks, by geeks," insists Stephan Ramoin, CEO. Gandi has a simple but ambitious commitment: "to create the company in which we would like to work, and sell products and services that we would buy as customers."

Gandi organizes Hackathon.TAIPEI

Hackathon.TAIPEI, co-hosted by the Taipei City Government and the domain name registrar Gandi.net, has taken place on December 5th and 6th at the Hi-Tech Promotion Center in Taipei. A total of 10 teams gathered together to build projects around and with .TAIPEI (dot-Taipei), the new top level domain for Taipei City which now exists alongside other top level domain names (such as .COM / .NET / .TW). After 2 days of hacking, every group submitted their project and provided a demonstration to ...
