

Teamleader wins TNW Boost Competition henQ Award

With pride we'd like to announce that the Belgian startup got recognized at The Next Web Europe and it will take home the henQ Award 2015.

Teamleader, a unified CRM, invoicing and project planning, claimed the big prize at The Next Web Europe pitching competition held on April 24th. The Gent-headquartered startup took home the henQ Award 2015 equivalent to €100,000.

Founded in 2012, Teamleader is an online application to easily manage contacts, opportunities, invoices and projects.

Brought to Amsterdam as part of Belgian non-profit organization Teamleader was joined by other seven early-stage startups: Sentiance, Assisto and The Learnscape. Well done, #BeTech!
