NEW FFWD FIVE-T

FFWD WHEELS INTRODUCES THE BEST FIVE SPOKE FRONT WHEEL

FFWD Wheels offers a broad range of high end carbon wheels for different categories, whether it be for road, track or triathlon we have your choice of wheels. On the track our FIVE-T front wheel has brought many riders to success in races.

The new FIVE-T will take its performance to another level! By applying 1k carbon layers (instead of 3k carbon) this wheel has an even higher stiffness to weight ratio and will make sprinters even more confident on their way to the finish line! Remaining the low weight yet increasing the stiffness by 6% makes this a killer wheel for track riders. The closing system has also been updated with an in axle bolt which also makes the wheel stiffer and increases the durability.

Weight:835 grPrice:1699 EuroAvailability:End of October
