

FFWD WHEELS LAUNCHES THE TYRO

THE NEW STANDARD IN CARBON WHEELS BELOW 1000 EURO

PHOTO CREDIT: LEON VAN BON

Being all about producing the best wheels to make you go fast we took the knowledge and experience of our top model and implemented them in a new model at a new price level - the TYRO!

This wheel set is for the cycling enthusiast who knows what difference good wheels can make and goes for quality and is looking for the ultimate balance of both price and quality. He wants that one carbon set that can be used at all times on all terrains. Not only on the road but with the possibility to fit tires up to 40mm the TYRO is also suitable for gravel use.

This **all-round** wheel set offers all common technical standards of today. A full carbon clincher set which is **tubeless** ready and only for **disc brakes**. High quality hub internals with a **ratchet system** and the same wheel building quality FFWD is known for at the spectacular price of 999 Euro for the set! As usual the wheels come with accessories included in the nice FFWD wheelbag.

The new FFWD TYRO will be available for delivery in April in stores and online.

For all the details and specifications of this great wheel set please check the attached specification chart and visit our [media kit](#) for more images. Check out our introduction [video](#)!

About FFWD Wheels:

From their facility in Zwolle, The Netherlands a team of cycling enthusiasts work on the development and production of high-end wheels for the road, gravel, track and triathlon disciplines. The wheels are distributed through a world wide network of partners who share the focus on delivering the best possible service to riders.
