

Tesla drivers can now fast-charge at Fastned

Fastned adds Tesla adaptors to all 50 stations

Amsterdam 2 maart 2016. **Fastned, that is building a pan-European network of fast charging stations where all electric cars can charge, will add Tesla adaptors at all of its 50 stations in the Netherlands within the next month. The adaptors allow Tesla drivers to quickly recharge their car and continue their journey. The 50 Fastned locations are a big step up from the current 7 Tesla superchargers in the Netherlands. With these new locations Tesla drivers no longer have to make detours to fast-charge their car.**

At the moment there are almost 5000 Tesla cars in the Netherlands, and this number is growing rapidly. With the Tesla adaptors at all Fastned stations, Tesla drivers can now charge super fast and easy in all of the Netherlands. Michiel Langezaal, CEO of Fastned: “Before the end of March Tesla drivers will have 50 extra fast charging stations in the Netherlands. They don’t have to make detours to fast-charge, thus saving time and energy.”

Vincent Everts, Tesla driver and board member of the Dutch Club for Electric Drivers (VER): “This is a great initiative by Fastned, which shows impressive growth with its current 50 fast charging stations. With this CHAdeMO adaptor I can now recharge everywhere in The Netherlands up to 250 km/uur. When your battery is low you know that there will always be a station closeby.”

ABOUT FASTNED.EN

Fastned is building the world's first network of fast-charging stations where all electric cars can charge. We are building stations at high traffic locations along the highway, where electric cars can charge in 20 minutes. This will provide freedom for electric cars to drive everywhere throughout Europe. As of today, 50 stations are operational in The Netherlands and Fastned is planning to expand its fast charging network to the rest of Europe.

Fastned is rolling out it's network of fast charging stations in response to the rapidly increasing numbers of EV's in Europe. Car manufacturers such as [Tesla](#), [Audi](#), [Volvo](#), [Aston Martin](#), [BMW](#), [Nissan](#), [Mitsubishi](#), [Porsche](#), [Volkswagen](#), [Mercedes](#), [Ford](#), [General Motors](#) and [Renault](#) are investing billions of Euro's in the development of, and production capacity for EV's. More and more EV's are hitting our roads which drives the need for charging infrastructure. Fastned is responding to this development by building the service stations of the future. Co-founder and CEO Michiel Langezaal: " We are the Shell of the future, only our energy comes from the sun and the wind."
