

Fastned shows 14% monthly growth in 2015

Fast-charging company publishes Annual Report 2015

Amsterdam, 10 March 2016.

Highlights:

1. 50 stations operational compared to 19 in 2014
2. 14% month-on-month sales growth
3. 229% growth in number of active customers
4. 244% volume growth compared to the previous year
5. Over 20 million Euro capital raised
6. 'Industry-first' network uptime of 99.99%

CEO Michiel Langezaal: "Fastned has developed strongly, both in terms of network as well as sales, systems and partnerships. Revenues of 75 889 euro is still small but we saw sales grow last year by more than 700%. Nearly all car manufacturers have announced new electric models with a bigger range, the first models will be introduced on the market later this year. As a result, our outlook is very positive. Fastned has secured financing for its operational costs until the end of 2018. This covers the period until a serious charge market for electric cars has emerged and a considerable number of stations is profitable. With the current network of 50 stations, we have created a solid foundation for further growth. At the moment we are working on expansion into urban locations and the rest of Europe. To finance this growth we will issue new certificates of shares very soon again."

ABOUT FASTNED.EN

Fastned is building the world's first network of fast-charging stations where all electric cars can charge. We are building stations at high traffic locations along the highway, where electric cars can charge in 20 minutes. This will provide freedom for electric cars to drive everywhere throughout Europe. As of today, 50 stations are operational in The Netherlands and Fastned is planning to expand its fast charging network to the rest of Europe.

Fastned is rolling out it's network of fast charging stations in response to the rapidly increasing numbers of EV's in Europe. Car manufacturers such as [Tesla](#), [Audi](#), [Volvo](#), [Aston Martin](#), [BMW](#), [Nissan](#), [Mitsubishi](#), [Porsche](#), [Volkswagen](#), [Mercedes](#), [Ford](#), [General Motors](#) and [Renault](#) are investing billions of Euro's in the development of, and production capacity for EV's. More and more EV's are hitting our roads which drives the need for charging infrastructure. Fastned is responding to this development by building the service stations of the future. Co-founder and CEO Michiel Langezaal: " We are the Shell of the future, only our energy comes from the sun and the wind."
