

Fastned partners with The New Motion

Fastcharging at Fastned now possible with The New Motion charge card

Amsterdam, 10 May 2016. **As of today it is possible to charge at Fastned with the charge card of The New Motion. After entering the card number in the Fastned app once, EV drivers can easily start and end charging sessions with the Fastned app. Payments are handled with the collective invoice of The New Motion, which streamlines administration of the customer.**

Fastned CEO Michiel Langezaal: "Electric driving is becoming more and more attractive. And it's all about convenience and freedom. By partnering with The New Motion, the largest provider of charge cards in the Netherlands, we reduce the administrative burden of EV drivers. And they have the freedom to drive anywhere."

Sytse Zuidema, CEO The New Motion: "Our focus on the continued expansion of the number of charging points in Europe, and the ease of the transaction, is highly valued by our customers. By partnering with Fastned we make sure that The New Motion continues to support the most comprehensive network of charging points in the Netherlands. We are very pleased that drivers with a pass of The New Motion can now easily pay at the fast charging network of Fastned."

The connection is operational, so EV drivers with a The New Motion pass can start using this new possibility directly. Last year MultiTank Card and Travelcard already connected their fuel cards to the fast charge network of Fastned.

ABOUT FASTNED.EN

Fastned is building the world's first network of fast-charging stations where all electric cars can charge. We are building stations at high traffic locations along the highway, where electric cars can charge in 20 minutes. This will provide freedom for electric cars to drive everywhere throughout Europe. As of today, 50 stations are operational in The Netherlands and Fastned is planning to expand its fast charging network to the rest of Europe. Fastned is listed on the [Nxchange](#) stock exchange.

Fastned is rolling out it's network of fast charging stations in response to the rapidly increasing numbers of EV's in Europe. Car manufacturers such as [Tesla](#), [Audi](#), [Volvo](#), [Aston Martin](#), [BMW](#), [Nissan](#), [Mitsubishi](#), [Porsche](#), [Volkswagen](#), [Mercedes](#), [Ford](#), [General Motors](#) and [Renault](#) are investing billions of Euro's in the development of, and production capacity for EV's. More and more EV's are hitting our roads which drives the need for charging infrastructure. Fastned is responding to this development by building the service stations of the future. Co-founder and CEO Michiel Langezaal: " We are the Shell of the future, only our energy comes from the sun and the wind."
