

Fastned to sell nationwide, superfast charging like mobile telephony

Amsterdam, April 30 2015. **Fastned, a fast growing startup which is building a nationwide network of 200 fast charging stations along Dutch highways, has introduced price plans which are very similar to mobile telephony. Fastned now offers unlimited fast charging for 100 euro per month, fast charging for 35ct/kWh based on a monthly fee of 12 euros, and charging per kWh for incidental customers. All price plans are based on charging at 50 kW, 100% solar and wind power, multiple chargers per station and free Wifi at all stations, locations directly along the highway, and an uptime of 99,9%.**

Co-founder Michiel Langezaal: “Petrol is sold per litre, but the way we sell electricity will look more like mobile telephony with prepaid, flat fees and bundles. The low marginal cost of electricity allows us to go where no petrol station can follow.” Based on these price plans EV drivers can choose the option that best fits their needs. The incidental customer can pay per kWh. Those who drive a lot can opt for the Unlimited plan, and regular users can choose the ‘Standard’ plan that lets them fast-charge for the same price as slow charging based on a monthly fee of just 12 euro (including VAT). The latter price plan makes fast charging just as accessible as slow charging, giving EV drivers the freedom to drive and charge where they like. Customers can sign up for the price plans via the new website of Fastned: www.fastned.nl/en and can be changed or stopped every month.

“Petrol is sold per litre, but the way we sell electricity will look more like mobile telephony with prepaid, flat fees and bundles. The low marginal cost of electricity allows us to go where no petrol station can follow.,,”

— Michiel Langezaal, CEO and co-founder Fastned

ABOUT FASTNED.EN

Fastned was founded in 2011 by Bart Lubbers and Michiel Langezaal with the aim to realise a nationwide network of fast-charging stations for electric cars. In 2012 Fastned acquired concessions to realise fast charging stations at 201 out of the total of 245 service areas along Dutch highways.

In November 2013 the first 5 stations were opened. As of today, 37 stations are operational and Fastned is adding one new station every week. Fastned is also looking for opportunities to expand to other countries.

Fastned is rolling out it's network of fast charging stations in response to the rapidly increasing numbers of EV's in Europe. Car manufacturers such as Tesla, BMW, Nissan, Audi and Volkswagen are investing billions of Euro's in the development of, and production capacity for EV's. More and more EV's are hitting our roads which drives the need for charging infrastructure. Co-founder and CEO Michiel Langezaal: " We are the Shell of the future, only our energy comes from the sun and the wind."
