

Fastned offers shareholders lifetime free charging

Amsterdam, 19 mei 2015. **Starting today, the Dutch company Fastned offers their shareholders the unique benefit of free fast-charging at all Fastned stations for the rest of their life. For this purpose the fast growing company today launched the Fastned Founders Club. Investors that purchase more than 2500 certificates of shares of Fastned of 10 euro apiece automatically become a member of this club and can immediately start charging for free. Joining the Founders Club is a unique and once in a lifetime opportunity for everyone who thinks about driving an electric car and sees opportunities in investing in the service stations of the future.**

Fastned already has 31 stations operational, and is adding one new station every week. Co-founder and CEO Michiel Langezaal: “Our goal is similar to mobile telephony - to create a national network of fast charging stations with national coverage, which allows electric cars to go anywhere with peace of mind. Anyone who invests a substantial amount today becomes co-owner of the infrastructure of the future and can use it for free, forever.” Apart from being a shareholder and the privilege of free lifetime charging, members of the Fastned Founders Club are invited to the annual Founders Dinner. Here they can meet other like minded investors and pioneers. The Fastned Founders Club will only be open for a limited time, and for a finite number of investors. At launch the club already has 17 members. Investing is possible via the Fastned website: www.fastned.nl/en/invest. Free charging will automatically be enabled for shareholders who own more than 2500 certificates.

“Our goal is similar to mobile telephony - to create a national network of fast chargers, which allows electric cars to go everywhere with peace of mind. Anyone who invests a substantial amount today becomes co-owner of the infrastructure of the future and can use it for free, forever..”

— Michiel Langezaal, CEO and co-founder Fastned

Fastned was founded in 2011 by Bart Lubbers and Michiel Langezaal with the aim to realise a nationwide network of fast-charging stations for electric cars. In 2012 Fastned acquired concessions to realise fast charging stations at 201 out of the total of 245 service areas along Dutch highways.

In November 2013 the first 5 stations were opened. As of today, 37 stations are operational and Fastned is adding one new station every week. Fastned is also looking for opportunities to expand to other countries.

Fastned is rolling out it's network of fast charging stations in response to the rapidly increasing numbers of EV's in Europe. Car manufacturers such as Tesla, BMW, Nissan, Audi and Volkswagen are investing billions of Euro's in the development of, and production capacity for EV's. More and more EV's are hitting our roads which drives the need for charging infrastructure. Co-founder and CEO Michiel Langezaal: " We are the Shell of the future, only our energy comes from the sun and the wind."
