

NH Prague City has started the season with a new look

- **NH Prague City, as a member of the Spanish NH Hotel Group, never compromises on quality**

Berlin, May 15, 2017. NH Prague City welcomed the new season in completely new shape. The hotel's uniqueness is underlined by its two buildings, which are connected by the famous funicular "Lanovka", whereby the upper building offers a beautiful view of the Czech capital. The four-star-hotel has 442 stylishly decorated standard rooms, as well as superior rooms, including 28 suites. The project of the complete reconstruction of the property has been worked out by the team of BEHF architects' office led by the famous Austrian Architect Mag. Arch. Stephan Ferency. The entire renovation process was split into two phases. The first part, focused on rooms, lifts and restaurant, has been successfully finalized last year. The second part, which included reconstruction of the public areas – especially the main lobby and reception area, started in January 2017 and has been finalized before the main season in spring 2017.

"Always a Pleasure" - NH Prague City

Newly renovated superior rooms are completely furnished with a new design including modern furniture, paintings, carpet and electronic equipment. One of the main advantages of the new rooms are the comfortable "NH Sleep Better" beds enabling all hotel guests to relax and enjoy a great stay in the hotel. To ensure absolute comfort for all guests, each hotel is equipped along with the new modern furniture also with electronic devices, minibar, safe and own Nespresso machine.

The Italian restaurant "Ristorante Il Giardino Toscana" located in the executive building of the hotel, has absolutely changed its previous rustic look to a more modern and pure style. The restaurant, which has a breathtaking view over the Czech capital, serves mainly Italian cuisine from the Tuscany region. The outside façade of the main building changed also its surface from pink to a more elegant beige color.

The second period of the reconstruction started in January 2017 with the complete changeover of the main lobby and reception area. The architects chose modern and luxury materials for the refurbishment. The hotel lobby got new floor and wall tiles, ceilings, lights, seating area and an especially outstanding reception with admirable backlit desk made out of cut glass.

The best way how to discover the new look of NH Prague City is to come and experience it personally.
