

LemonadeLXP Named a Top 10 Employee LMS Winner in the 2026 Talented Learning Awards

In a market crowded with general-purpose tools, independent analysts honor a learning platform built exclusively for banks and credit unions.

OTTAWA — October 28, 2026 — **LemonadeLXP**, the AI-powered learning and knowledge platform for financial institutions, today announced that it has been named a **Top 10 Employee LMS winner in the 2026 Talented Learning Awards**. The awards go to companies that stand out for their capabilities, market focus, innovation, and value to learning organizations.

Banks and credit unions have never had so many learning systems to choose from. Talented Learning, an industry research firm, counts more than 1,000 on the market this year. Most are one-size-fits-all tools that weren't built for banking. Before they invest, leaders need evidence that a platform will hold frontline staff's attention, track compliance, and lift results.

Third-party recognition provides that evidence. Talented Learning selects its own winners, guided by continuous market analysis, product evaluations and demos, and conversations with buyers and customers.

"LemonadeLXP stands out because it is purpose-built for the realities of employee learning in financial services," **said John Leh, CEO and Lead Analyst at Talented Learning**. "Its combination of game-based learning, AI-powered knowledge access, compliance support, digital adoption and frontline enablement gives banks and credit unions a highly focused platform for improving speed-to-competency and day-to-day performance."

In practice, those strengths take shape in tools like [LemonadeLXP's InsightAI](#), for instant answers from approved policies; [AI Conversations](#), for rehearsing customer and member

interactions; and built-in certifications and reporting that simplify compliance. The **Content Exchange** adds ready-made banking content, so training teams never start from scratch.

"This award belongs to our team, who built a platform frontline staff actually want to use, and to our bank and credit union customers, whose feature guidance shaped every part of it," **said John Findlay, CEO at LemonadeLXP**. "Together we've created training that drives faster digital adoption, more confident cross-sell conversations, and better member and customer experiences. Being named a Top 10 Employee LMS by Talented Learning is a great validation of those results."

This year's win builds on a steady track record with Talented Learning: Top 20 Specialist Learning Platform in 2022, a place on the Top 10 Learning Systems Watchlist in 2023, and recognition in the Employee LMS category in 2025.

Institutions weighing their options can see the award-winning platform for themselves by [booking a demo](#). The full list of 2026 winners is available on the [Talented Learning official awards page](#).

About the Talented Learning Awards

The Talented Learning Awards recognize outstanding learning technology providers across key segments of the global learning systems market. Winners are selected independently by

Talented Learning based on ongoing market research, product evaluations, demonstrations, buyer and customer interactions and more than a decade of learning technology analysis.

About Talented Learning

Talented Learning is an independent learning technology research and consulting firm that helps organizations understand the learning systems market, evaluate solutions and select technology that fits their business requirements. Learn more at talentedlearning.com.
