

# BDO USA, LLP announces launch of BDODrive, an integrated cloud-based financial management & accounting service

BDO USA, LLP, one of the nation's leading accounting and consulting organizations, today announced the launch of [BDODrive](#), a new integrated solution for financial management, accounting services and business intelligence. BDODrive provides clients with a real-time, mobile view of their business's performance and access to a dedicated team of experienced professionals to provide analysis, identify opportunities and collaborate on growth strategies. Powered by Microsoft and Intuit, BDODrive leverages leading-edge, cloud technology and security to bring a new level of efficiency and standardized best practices to outsourced finance and accounting services.

“BDODrive fundamentally improves upon the traditional concept of business outsourcing. It gives clients the power of rich information, business intelligence and insight that enables them to operate more efficiently and effectively,” said Kelly Johnson, Partner and National Practice Leader for Business Services & Outsourcing at BDO USA. “Working with Microsoft and Intuit we feel we have developed an industry-leading solution that brings increased efficiency to clients' financial function. Through our customized dashboard, clients will enjoy access to a real-time, mobile view of their businesses performance, enabling them to make faster and better informed decisions. Most importantly, BDODrive is scalable to client needs as they move through their life cycle and clients receive counsel and insight from a dedicated team of BDO professionals.”

Some of the key features delivered through the BDODrive service offering are accounting and financial management, online payments, auto bank feeds and reconciliation, business data analytics, secure document management and customized reporting of key performance indicators delivered in real-time with 24/7 mobile access. Most important, all of these features are enhanced by the active involvement of experienced BDO professionals who assist clients in identifying opportunities and mitigating risk.

“We are extremely pleased to be working with BDO USA on BDODrive. As the premier accounting firm serving middle market businesses, BDO is ideally positioned to drive adoption of cloud-based solutions at entrepreneurial companies,” said Paul White, General Manager Microsoft Dynamics SMB Product Marketing. “Other professional service firms are trying to move their clients online, but they don’t provide the value-added advisory relationship that BDO professionals bring to the table. Their analysis and insight greatly enhances the impact of the online solution for clients.”

“BDO has a long history of working with emerging businesses to help them grow and prosper. Like Intuit, they are focused on helping businesses adopt today’s online technologies and streamline processes to fuel their success,” said Tim Stahl, director of Accountant Sales, Intuit. “We have enjoyed working with BDO in the development of BDODrive and look forward to moving their small business clients online where they will achieve new levels of efficiency.” See more on Intuit and BDO partnership at [Intuit QuickBooks Alliance with BDO USA](#).
