BRIDGING THE REAL

THE COMPLETE INDOOR TRAINING SOLUTION

KICKR BIKE combines numerous indoor training innovations into a complete training machine, offering a ride experience that blurs the line between virtual and reality.

KICKR RIDE FEEL

KICKR BIKE combines KICKR's legendary resistance and grade simulation technologies to replicate the sensation of riding outdoors – including downhill simulation that allows you to maintain speed on virtual descents.

POWER

With accurate power measurement (+/- 1%) and over 2,200 watts of resistance, KICKR BIKE provides cyclists with reliable data and power ranges for training on the most demanding races, routes and rides.

VIRTUALLY SILENT

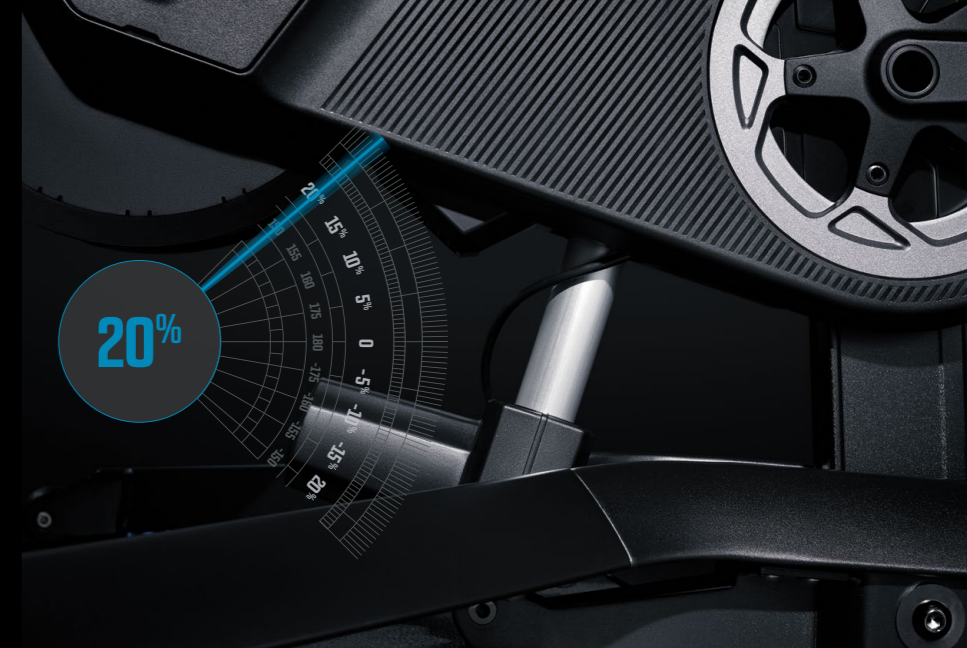

The balanced, belt-driven motor on KICKR BIKE combines years of engineering knowledge to create a virtually silent riding experience.

DURABILITY

KICKR BIKE is built from the same robust materials and standards as our trainers. So whether you spin, crank or mash, ride in the saddle or out, its solid stance and steel construction will stay in place and withstand anything you can dish out.

NEXT-LEVEL TRAINING

KICKR BIKE simulates grade changes in real time, offering a virtual experience of riding up and over steep mountain passes – including downhill simulation that allows you to maintain bike speed.

KICKR BIKE's linear actuator quickly raises and lowers the bike to match ascents of up to 20% and descents of -15%.

PRECISION & PERFORMANCE

KICKR BIKE's large flywheel and internal motor brake use proven algorithms that offer an unrivaled combination of accuracy, responsiveness and realism.

REALITY SHIFT

Programmable virtual shifting allows KICKR BIKE to match the gear ratios and functionality of group sets from leading manufacturers like SRAM, Shimano and Campagnolo today and in the future.

CONTROL AT YOUR FINGERTIPS

KICKR BIKE shifter controls let you easily toggle through different gears and manually control grade changes.

VIRTUAL GROUPSET

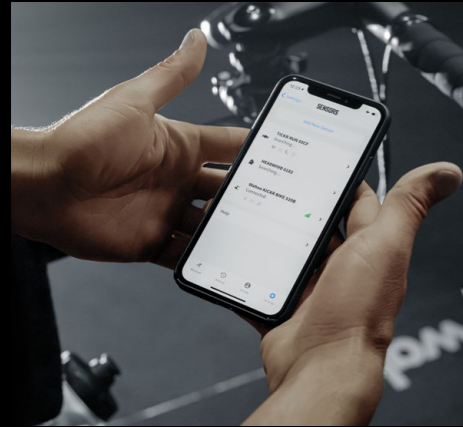

Match the gearing from leading manufacturers with KICKR BIKE's programmable virtual group set. Get the most out of your training by selecting exact gear ratios, including the number of speeds and even cassette tooth count.

MORE POWER TO YOU

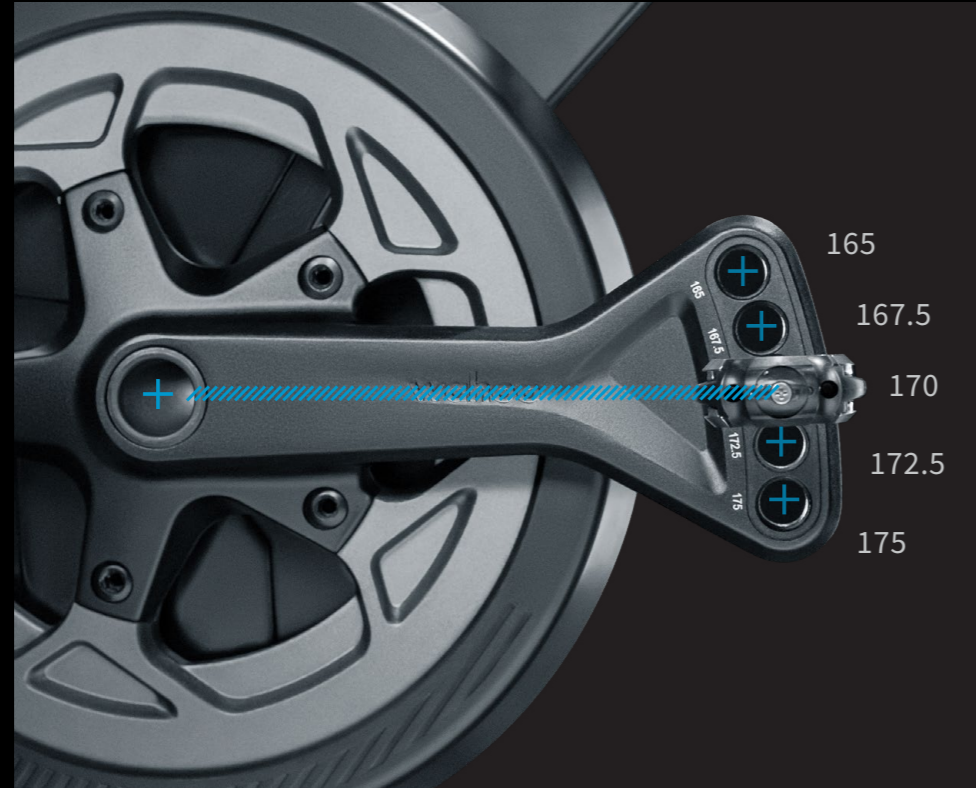

The digital LED display on KICKR BIKE, clearly communicates both gearing and grade to let you maximize power and efficiency during every stage of every ride.

SET UP MADE EASY

Our simple and intuitive Wahoo Fitness App, offers guided instructions on how to match your KICKR BIKE's fit to your outdoor bike's exact geometry.

KICKR BIKE's patent-pending adjustable crank arm.

PERFORMANCE & COMFORT

Easily dial in your saddle height, crank length, reach and more to match your outdoor bike's fit, using KICKR BIKE's easy access quick release levers.

TRUEFIT

KICKR BIKE's intuitive adjustability and Wahoo Fitness App, quickly helps you personalize your fit to mirror the exact geometry of your outdoor bike. You can also customize it with your favorite components to optimize comfort and performance.

RIDE YOUR KIT

KICKR BIKE can be customized with your favorite saddle, bars and pedals to match your outside bike.

Shown with custom bars, stem and saddle

ONE BIKE, MULTIPLE RIDERS

Featuring easy access quick-release levers, KICKR BIKE fits a wide range of rider sizes and can be quickly reconfigured, offering the ultimate in convenience for households with multiple users.

COMPATIBILITY WITHOUT COMPROMISE

As with all Wahoo trainers, KICKR BIKE is compatible with the most popular training apps like The Sufferfest, Zwift, TrainerRoad and more, so you can ride your way.

RIDE READY

Once set up, the KICKR BIKE is ready to roll. It is calibration free, seamlessly integrates into the Wahoo product ecosystem and easily pairs to your ELEMNT GPS Bike Computer, smartphone, tablet or PC, so you can go from zero to ride immediately.
