Remco Tools Expands European Reach with SEMC.pro as New French Distributor

Gent, Belgium 01 October 2026— [Remco Tools](#) has announced a partnership with SEMC.pro to handle the distribution of its products in France. The entire product line will be available to order through the [semc.pro](#) b2b portal Starting October 1st.

The agreement makes Remco Tools' workshop equipment — including its professional bicycle repair stands and growing catalog of tools — directly available to bicycle shops and mechanics across France through SEMC.pro's distribution network.

"We are very happy to partner with SEMC.pro to bring our workshop tools to France this October," said Mathias Ellegiers, founder of Remco Tools. "France has a strong and growing mountain biking market. SEMC.pro has a solid reputation for distribution and service, which makes them the right partner to help us support French mechanics with reliable, heavy-duty equipment."

Remco Tools will also exhibit at Roc d'Azur this year, giving visitors the opportunity to try the equipment firsthand and get a feel for its build quality, ease of use and practical benefits in the workshop.

French bicycle retailers and workshops can place orders and check product availability directly through SEMC.pro starting October 1st 2026.
