

Lazer completes Compact unisize range.

The Lazer Compact helmet range provides comfort, safety and style, in an attractive and low-priced package. One size is all you need with these helmets.

Following to the launch of the Lazer Compact helmet last year, Lazer now completes the Compact family with four additions: a DLX (delux), DLX MIPS and a version for smaller head sizes (available in MIPS and non-MIPS versions).

### **Lazer Compact DLX**

The Lazer Compact DLX helmet provides comfort, safety and style, in an attractive and low-priced package. One size is all you need with this helmet. The helmet is outfitted with an integrated insect net and a rear mounted LED light for extra visibility and safety. The MIPS low friction layer inside the DLX MIPS helmet provides additional protection against rotational impacts, but doesn't interfere with the helmets existing protective capabilities, making safe even safer!

Thanks to the smart design, the Compact offers a stylish unisize solution for head circumferences ranging from 54-61 cm.

### **Lazer Compact DLX W**

Riders with smaller heads looking for an affordable yet classy helmet will now also be able to get their hands on a Lazer Compact helmet. With the addition of the Lazer Compact DLX W, the range is extended with a smaller shaped helmet fitting to 50-57 cm head circumferences.

The Lazer Compact DLX W offers similar features and specification as the Lazer Compact DLX and is available in both MIPS and non-MIPS versions.

### **Lazer Compact**

At Lazer we believe that every cyclist should be protected in style, independent on available budget. With having the price-sensitive consumer in mind, we launched the fully renewed Lazer Compact helmet to be available within the 2018 range. This Lazer Compact helmet is greatly improved over its popular original model and offers a great value for money solution for commuters, e-bike riders and even MTB'ers.

The Lazer Compact is Lazer's first in-mold helmet below the 40 euro price point (MSRP: €35/\$40); which makes it an extremely competitive helmet for the looks and specifications. It features universal sizing offering retailers to generate business with the lowest possible inventory level, yet still offering consumers a great fit within a wide size range. The Compact comes in at a weight of 325 grams and is available in 5 commercial colours. The Lazer Compact features 21 vents for a high airflow as well as Lazer's patented Turnfit TS+ fitting system. An optional LED light can be fitted to the dial on the retention system for added visibility.
