

Sustainable Aviation Fuel Follow-Up Response

What is the percentage of SAF included in the Bell Training Academy aircraft fuel tank?

The aircraft fuel content will be around 70 percent Jet A fuel and 30 percent sustainable aviation fuel.

Is that SAF mix true for demo flights as well? Yes, based on availability.

Is the SAF for demo and training flights at both the U.S. and Valencia sites? We do not have any aircraft based at our Valencia, Spain sites, so SAF will not be used at our Bell Training Academy facility there.

Please reach out to [Alexis Baird](#) for any follow-up questions around Bell's uses of Sustainable Aviation Fuel.
