

**Joshua R. O'Neil,
Chief Engineer,
Bell 525**

Commercial Business

Joshua R. O'Neil serves as the Bell 525 Chief Engineer, focused on leading the model 525 strategic development, test, and certification efforts. Joshua possesses more than 17 years of experience in aviation, spanning program management, research and development, flight test, and international business development.

Prior to his current role, Joshua led multi-functional engineering teams on the 525 program from the earliest design development phases through the build and test of its state-of-the-art aircraft technologies. During his tenure at Bell, Josh has been involved in numerous research and development programs for both commercial and military aircraft.

Joshua holds B.S. and M.S. degrees in Aerospace Engineering from Texas A&M University and a B.S. in Mathematics from the University of St. Thomas.

ABOUT BELL

Thinking above and beyond is what we do. For more than 80 years, we've been reimagining the experience of flight – and where it can take us.

We are pioneers. We were the first to break the sound barrier and to certify a commercial helicopter. We were a part of NASA's first lunar mission and brought advanced tiltrotor systems to market. Today, we're defining the future of on-demand mobility.

Headquartered in Fort Worth, Texas – as a wholly-owned subsidiary of Textron Inc., – we have strategic locations around the globe. And with nearly one quarter of our workforce having served, helping our military achieve their missions is a passion of ours.

Above all, our breakthrough innovations deliver exceptional experiences to our customers. Efficiently. Reliably. And always, with safety at the forefront.
