

Europe's biggest sustainable mobility conference rEVolution reveals full program

The latest confirmations for rEVolution 2019 include speakers & workshops from Volkswagen, Carver, ChargePoint, TheClimateGroup, and the World Business Council for Sustainable Development (WBCSD).

Amsterdam, February 7th, 2018. [rEVolution](#), Europe's largest networking and idea-sharing conference, has revealed its (nearly) complete **program**. Joining an already packed lineup of morning keynote speakers is Martin Roemheld, Head of eMobility Services at Volkswagen, who will talk about Volkswagen's electric strategy. [ChargePoint](#) and [EVBox](#), the two biggest leaders in EV charging, will be joining forces in a brainstorm to make the impossible possible: finding solutions to help to make electric vehicle charging as easy as charging your phone.

Walking the talk

rEVolution 2019 sets out to connect people to create solutions: solutions to polluted cities, to raising sea levels, to global warming, and more. To achieve this, rEVolution also aims to lead by example by incorporating sustainable practices throughout the event:

- The event venue, the former gas factory Westergasfabriek, is now considered a prime example of sustainable redevelopment and aims to become 100% sustainable.
- Partnerships only with sustainable caterers and offering more vegetarian options.
- Consumption of green energy generated from waste.
- Discounts for electric transportation methods to get to the event and city.
- Reuse of as many materials as possible from previous editions and limitations on one-time use goodies and giveaways.

To find out more about the event, agenda and speakers, visit www.revolution19.amsterdam.
