# Thousands of cleantech experts join forces at REVOLUTION Conference to define the future of mobility

**Europe's biggest sustainable mobility conference, REVOLUTION, is coming back to Amsterdam for the fourth time, on March 31, 2020— featuring speakers from Bloomberg, Solar Impulse, Electrify America, Volkswagen, and many more.**

**Amsterdam, December 5, 2019** – Fasten your seatbelts. The transition to zero-emission transport is in full force. This year's REVOLUTION Conference will take place at Westergas in the heart of Amsterdam—the world leader in charging infrastructure. REVOLUTION invites you to learn from the successes and challenges of electric mobility adoption— through the first-hand accounts of thought leaders with 10 years of cleantech and mobility expertise.

The program includes renowned speakers such as André Borschberg (Co-Founder, CEO & Pilot, Solar Impulse), Sharon Dijksma (Deputy Mayor, City of Amsterdam), Bernice Notenboom (Polar explorer and climate journalist), Thomas Ulbrich (Volkswagen) and many others. The event will be hosted by EV Advocate & Consultant, Chelsea Sexton, and Roger Atkins, founder of Electric Vehicles Outlook LTD.

## **What to expect**

Visitors can expect fascinating keynotes covering topics such as corporate transformations in the face of mobility industry changes, energy transition, and the evolution of electric charging infrastructure. Speakers will also explore the rise of carsharing concepts and share insights into the unique experience of circumnavigating the globe with a solar-powered plane.

The event also allows room for networking, providing attendees with the chance to discuss the matters that are most crucial to them. At the [Market Place expo area](#), leading eMobility and cleantech companies can display their latest product developments and innovations; the Startup Area will give startups the chance to showcase their ideas.

*"We are facing a tipping point, not only for electric vehicles but for the essential shift to a circular economy. REVOLUTION Conference brings together people who are working hard to make a difference. I am happy to be part of such a movement once again and cannot wait to meet like-minded people. Together, we can make a managed transition to a sustainable future of transport."*

— Roger Atkins, Founder of Electric Vehicles Outlook LTD

*"I saw it with my own eyes: large polar trips are no longer possible, the ice has become too thin, it's melting. We are at a point where we have to decide on the future of the human species. To fight the climate emergency is something that every business should hold as the core of their business plans. I am looking forward to highlighting those issues at REVOLUTION and turning this into the top priority on people's minds. The planet is the biggest investment, not your wallet!"*

— Bernice Notenboom, Polar explorer and climate journalist

*"Let's stop dividing the market between us and them. We need collaboration, we need openness, and we need to enforce each other's strength."*

— Kristof Vereenooghe, CEO of EVBox
