EVBox continues to drive eMobility adoption in Central Europe

EVBox, the leading provider of smart and scalable charging solutions for electric vehicles around the world, opened its Warsaw office in February 2020 and has since continued to encourage the adoption of eMobility in Central Europe.

Warsaw, August 4, 2020—In February, EVBox announced the opening of its new Polish office during Dutch E-Mobility Day in Warsaw—an event organized by the Embassy of the Kingdom of the Netherlands and the [Polish Alternative Fuels Association \(PSPA\)](#). EVBox became a member of PSPA within the first few months of opening in Warsaw, and has already contributed significantly to the eMobility industry across Poland, Slovakia, and Czechia.

Award-winning collaborations

Together with Arval—a key player in integrated mobility—EVBox won the “eMobility financing low-emission transport” award at the ninth edition of the [Fleet Derby Awards](#). Both companies teamed up to offer a one-stop-shop service for future EV drivers in Poland that includes support for choosing an electric car and charger, as well as installation services.

Offering intelligent charging solutions to the Central European market

By offering intelligent charging solutions for residential, commercial, public, and fast-charging, EVBox will significantly boost the adoption of eMobility and the creation of much-needed charging infrastructure in Central Europe. The portfolio ranges from home chargers (3.7 kW – 22 kW) and fast-chargers (up to 100 kW) to ultra-fast chargers (up to 350 kW) and sophisticated charging management software.

Building strong partnerships

In order to boost the charging infrastructure in Central Europe and make it accessible to everyone, EVBox is partnering with different distributors and resellers—including [EVplus](#), Naatu, [Natoni](#), and [Solar](#).

Installers, businesses, and EV drivers will not only be able to get support for sourcing the right charging station but also benefit from installation training sessions, as well as other services.

“We are pleased that as a result of this cooperation with EVBox, we will be able to expand the range of charging stations. We're also excited that we'll be able to integrate these chargers with Fortum Charge @ Drive backend software to offer Polish customers proven products and services.”

— Przemysław Kaldowski (Board representative of EVplus)

“Solar Polska is a part of Solar Group—a leading Northern European sourcing and services company that specializes in electrical and installation solutions. We've been present in Poland for more than 20 years, and we're proud of our well-established sales network. This partnership with EVBox is crucial to helping us increase the distribution of eco-friendly products and solutions to a wide range of individual and institutional customers.”

— Name (XX, Solar Poland)

“I am happy to see the initial success of EVBox in the markets of Poland, Slovakia, and Czechia as a result of its local presence in Warsaw. EVBox has 10 years of experience in manufacturing intelligent charging solutions, and this expertise is recognized and appreciated by our partners in the region.”

— Janusz Grądzki (Regional Director Poland, Slovakia & Czechia at EVBox)

EVBox BusinessLine for workplace charging

ABOUT EVBOX

EVBox drives sustainable mobility by providing smart and scalable charging infrastructure and charging management software to electric vehicles around the world. Powered by ENGIE, EVBox has placed over 125,000 charging points across more than 70 countries. With residential, commercial, public, and fast-charging solutions, EVBox is helping to build a future where everyday transport is emission-free.
