EVBox launches new Charge app to enable credit card payment for EV drivers at EVBox charging stations in Europe

EVBox, leading manufacturer of smart and scalable charging stations, introduces its new charging management app—EVBox Charge—which enables EV drivers to pay with their credit card at charging stations managed by EVBox.

Amsterdam, November 5, 2020—With the exponential growth of the electric vehicle (EV) market, customers and future EV drivers need a reliable and hassle-free way to charge their EVs. For companies looking to set up electric vehicle charging at their locations, it can sometimes be hard to select the right combination of hardware, software, and field services as they are still considered stand-alone-offerings. As one of the global leaders in EV charging, EVBox is making customers' lives easier with its integrated solutions.

To give customers and partners the best possible EV charging experience, EVBox is bundling all components and offers into an all-in-one solution—including EV charging stations, charging management software (powered by [Everon](#)), and eMobility services. With this offering, customers and partners will benefit from EVBox's extensive support program that includes technical trainings, 24/7 customer support, and more.

Introducing credit card payment options for EV drivers

EVBox is introducing the new charging management app—EVBox Charge—created for station owners that want to enable any driver to pay with ad hoc credit card payments at their charging locations. This means that drivers can charge their EV without needing a dedicated or public charge card when using a station managed by EVBox—they can just download the EVBox Charge App, add their credit card and start charging instantly. Drivers will receive accurate price information before their charging session and will be able to pay with their credit card (VISA and Mastercard). With an EVBox charge card drivers can access more than 120,000 public charging points in Europe. The app is available in both Apple Store and Google Play and this new payment option will be available throughout Europe*.

**The EVBox Charge App is now available for Netherlands, Belgium, Luxembourg, Ireland, UK, France, Poland, Sweden, Norway, Denmark, Finland, Spain and Italy.*

Why price transparency in eMobility matters

EVBox facts

- **150,000+ charging points** powering EV drivers
- **5,000+ fast charging points** installed worldwide
- **70+ countries** powered by EVBox
- **500+ EVBoxers** around the world
- **60+ nationalities** working together
- **13 offices** across Europe and North America
- **80K+ trees planted** via our OneChargerOneTree initiative

Our story

EVBox is the leading global manufacturer of electric vehicle charging stations and charging management software. In 2010, EVBox made its breakthrough when the market for electric vehicles (EVs) was still in its infancy. A techie at heart, co-founder Bram saw the importance of having a connected charging infrastructure at an early stage. EVBox soon became the sole supplier of public charging infrastructure in cities such as Amsterdam, Rotterdam and Monaco. Meanwhile, EVBox played an active role in creating and innovating Smart Charging technologies and roaming of charging infrastructure with industry partners.

In 2014, Gilde Equity Management Benelux became EVBox's new major shareholder to help EVBox expand internationally. Key reasons for Gilde's entrance were EVBox's strong market position in the Dutch industry, its customer base and range of expertise, as well as the exponential growth of electric vehicle sales around the world.

In 2017, EVBox was acquired by ENGIE Fab, who identified EVBox as a disruptive, leading cleantech company making a difference in the fast growing industry of electric mobility. Today, EVBox moves forward as a strong leading brand perfecting its original recipe: a second generation of hardware and software that are energy efficient, future proof, and easy to use. Charging solutions with uncompromising quality and reliability.
