Norlys signs multi-year partnership with EVBox Group to boost electric mobility across Denmark

EVBox Group, a leading global provider of flexible and scalable charging solutions for electric vehicles (EVs), and Norlys, Denmark's largest energy and telecommunications group, will install 300,000 charging stations across Denmark by 2030.

AMSTERDAM, September 16, 2021 — [Norlys](#) and EVBox Group have partnered to provide innovative charging solutions for both the private and public sectors that will benefit drivers across Denmark. EVBox charging stations, powered by the EVBox charging management software [Everon](#), will be integrated into Norlys' product portfolio.

Enhancing Denmark's EV charging network

The Danish government has set a goal of having 760,000 electric and hybrid cars on its roads by 2030 which will greatly increase the demand for EV charging infrastructure in the country. Norlys and EVBox Group will install 300,000 charging stations at driveways and workplaces across Denmark by 2030, thus helping to establish a much-improved charging network needed to further establish electric mobility in Denmark.

Cooperation, partnerships, and taking responsibility for our communities are extremely important to Norlys. By entering into an agreement with EVBox Group, we not only get a partner that also shares our same values but also understands that collaboration lies at the core of a transition to sustainable living.

— Mads Brøgger (Director of the energy division at Norlys)

As Denmark's largest energy and telecommunications group, Norlys can play a big role in establishing EV charging infrastructure that will usher in a new era of sustainable mobility in Denmark. We are proud to partner with a company that is equally ambitious and passionate about such projects that will help to look after the future of our planet. EVBox Group has over a decade of experience in the electric mobility industry, and boasts innovative solutions designed to support EV drivers for years to come. There is no doubt that this partnership will benefit EV drivers across Denmark

— Bram Poeth (CCO at EVBox Group)

About Norlys

Norlys brings Denmark on board. Through green and digital services in energy, internet and TV, we connect people with people, and people with the world. We are a consumer-owned company that thinks long-term and takes responsibility for more than just ourselves. We want to contribute to a green and digitalised Denmark. Norlys is a result of the merger between SE and Eniig. With 730,000 shareholders, approximately 1.5 million customer relationships and 2,500 employees, we are Denmark's largest energy and telecommunications group.

ABOUT EVBOX GROUP

Founded in 2010, EVBox Group empowers forward-thinking businesses to build a sustainable future by providing flexible and scalable electric vehicle charging solutions. With its extensive portfolio of commercial and ultra-fast [EVBox](#) charging stations, as well as scalable charging management software engineered by [Everon](#), EVBox Group ensures that electric mobility is accessible to everyone.

EVBox Group is a leader in R&D, with facilities across Europe and North America developing groundbreaking electric vehicle charging technology. With offices across the globe, including Amsterdam, Bordeaux, Munich, and Chicago, and strong foundations in dozens of markets, EVBox Group is working to shape a sustainable future of transportation.
