EVBox Group Partners With Q8 and Tango Electric to Put a Firm Focus On All-In-One Charging Solutions for Companies

Q8 is set to provide charging solutions for companies and their employees through its Q8 and Tango electric divisions. In cooperation with EVBox Group, a leading global provider of flexible and scalable charging solutions for electric vehicles, Q8 wants to realize its business goals by installing and operating EVBox charging stations at both its offices and at its employees' homes.

AMSTERDAM, November 23, 2021 — Q8 and EVBox Group are set to help companies with vehicle fleets smoothly transition to electric mobility by introducing a new, fully electric offering. Q8 will handle all aspects of the offering, from installation to after-sales services. In addition to supplying charging stations, EVBox will provide experts to support Q8 as it expands its [Q8](#) and [Tango electric](#) offering and network.

The accompanying Q8 and Tango electric charging card also provides access to 98 percent of all charging stations in the Benelux region. This represents a big step for Q8 in its bid to become a sustainable mobility player.

Employees with an electric company car will be able to charge at their offices using an [EVBox BusinessLine](#) charging station, or at home using an [EVBox Elvi](#). They will also get access to a network of over 92,000 charging ports in the Benelux region with the use of their Q8 and Tango electric charging card, which lets them access publicly available EVBox charging ports.

"Companies are taking big steps to electrify their fleets and need professional support throughout the transition. We're delighted that, thanks to our partnership with EVBox Group, we can provide our customers with a total package that supports their transition to electric mobility from start to finish. On top of this, we will continue to expand our European charging network that can be accessed through our charging card and app."

— Geert De Mil (E-mobility Manager at Q8)

"We are proud of our partnership with Q8, which enables them to offer their Benelux customers smart and scalable EV charging solutions for workplaces and the residential segment. It's great to see a company like Q8 fully committing to a sustainable future. With our shared ambitions, we hope to continue supporting them in the coming years using our vast experience in the electric mobility industry."

— Daniël Geerts (Regional Director at EVBox Benelux)

###

About Q8 and Tango electric

[Q8](#) and [Tango electric](#) offer more than 150,000 charging ports in Europe, mainly in the Benelux region, via an app and a charging card. Furthermore, they offer an integrated range of smart charging solutions, service for professional and residential e-drivers, businesses, cities, on the road, at work or at home. The end-to-end approach not only covers the total cost to drive electric in full freedom, but also guarantees competitive pricing and rewards loyalty.

Q8 and Tango electric are a part of Q8, which herewith fulfills its ambition to further develop into a sustainable mobility player and therefore continues to innovate and invest in future-oriented possibilities that make every customer's journey more sustainable. In addition to electric, the company is also focusing on more sustainable fuels such as HVO100, CNG and LNG. Q8 is one of the largest fuel players in the Benelux with more than 465 Q8 and 196 Tango gas stations and fuel supplies to professional end users and resellers. The company is also active in the production, marketing and sales of Q8 lubricants. In BeLux, Q8 also has a strong retail network of more than 150 local 'Shop&Go' convenience stores, together with Delhaize and Panos.
