

IT&E donates mobile devices in support of Catholic Social Services Giving Tuesday event

IT&E donated six BLU C5L devices equipped with a push-to-talk application and data service to Catholic Social Services in support of their Giving Tuesday event on December 1. Members of the organization used the devices to communicate as they coordinated the curbside distribution of 1,000 bags of food from the organization's Barrigada facility.

"Catholic Social Services has been serving our community for decades with unwavering commitment. Through their work, they touch the lives of many and make an incredible impact. We thank them for the opportunity to do our part to support their mission," said Jim Oehlerking, CEO of IT&E.

Catholic Social Services is one of the many organizations that IT&E unites with to alleviate hardships and build a stronger, happier community.
