

# STACT'S NEW UPDATE GIVES ATHLETES CONTROL OVER THEIR ACCOUNTS!

Athletes can now Create and Claim their profiles on STACT App!

10/17/2018 - STACT App's latest update (2.0.0) gives athletes and users the ability to create new or claim existing accounts allowing full control over their profiles. Starting today users will be able to update STACT App via iOS and Google Play stores then immediately start the claim account process.

**Features** - Athletes will be able to customize data such as their name, gender, height, weight, country, and place links to their social media accounts. In addition to the following data points users can upload profile and background images.

**Claim Account** - STACT has over five thousand athletes in their database with results and in-depth statistics. The existing athletes will need to claim their accounts and go through an identification process. You can check how the creation/claiming process goes here <https://support.stactapp.com/en/article/create-and-claim-accounts>

**The Road Ahead** - This holiday season STACT App will feature a registration system where athletes can link a payment method and register to events with the click of a button. STACT claims updates beyond registration will deepen the athlete experience with tailored push notifications and performance reporting.

"Athlete's gaining ownership over their accounts is a step forward to some exciting new features. In the future we plan on elevating this experience with registration, personalized event notifications, and eventually performance reports." said Mike Jegat, CEO of STACT.

"Registration will be our next focus and we are looking to push that update throughout the holiday."

***STACT App is available for free on iOS and Google Play***

---

#### ABOUT STACT APP

From the team that created YouRiding, comes their next project Stact App. Stact is a mobile app that allows you to find, follow and watch action sports competitions. Users can browse event schedules, information, media content, detailed results, in-depth stats and rankings. In addition to event data, users have access to all athlete profiles participating in these events. Athlete's stats and rankings are automatically generated from competition results. The data is coming from two sets of tools we provide to event organizers: an archive importer for past events and an event management / scoring solution for live events. The scoring solution offers online registration for athletes, a scoring platform for the judges, a video replay system, tools to generate scores and information graphics for a live video broadcast and automatic generation of leaderboards.
