

# Civica integrates EdSmart's School Organisation System to drive engagement

EdSmart is delighted to announce a new partnership with [Civica](#), one of Australia's leading suppliers of critical software applications, digital solutions and managed services that help transform the way organisations work.

This partnership sees the integration of EdSmart's cloud-based School Organisation System (SOS) for streamlining and enhancing daily school administration and relationship management with the Civica Education Suite (CES), Civica's leading SaaS (Software-as-a-Service) solution for schools. Together the two are expected to deliver increased efficiencies and engagement for schools.

The integration offers greater flexibility and time-savings to CES users at schools. It also results in increased engagement and collaboration between teachers and parents. EdSmart SOS transforms manual processes based on Google Sheets, emails, paper forms or slips and other school administration tasks into an ordered, secured and online format.

This allows school teachers to maximise time spent with students instead of on repetitive tasks. EdSmart's electronic forms are tightly integrated with CES allowing for a single sign-on.

The module uses CES as a single source of truth to query data for generating reports, slips and forms that pertain to the school students. EdSmart's analytics give detailed insights on the level of engagement and interaction to the users, helping them tweak their communication if needed.

Simon Jones, Managing Director for Libraries and Education at Civica, said Civica's partnership with EdSmart will ensure that Australian school teachers are spending less time filing forms and more time with the students.

“EdSmart's solution complements the Civica Education Suite in that it streamlines administration processes further and enables schools to focus on teaching and learning.

"We're pleased to be able to work with the likeminded EdSmart team to provide a truly holistic school management and teaching solution.”

"Our goal at EdSmart is to help schools improve teacher-student and teacher-parent collaboration by reducing the time taken to complete routine tasks," said Fiona Boyd, Co-Founder and CEO of EdSmart.

"The challenge with paper forms is they often remain unanswered, even though teachers spend considerable time in generating them. With EdSmart's platform, our schools have seen an average rise in engagement of more than 80 per cent within the first 24 hours of sending forms out."
