TSI World becomes UK distributor and EU support partner for EdSmart

TSI World has signed an agreement to become the EU support partner for EdSmart, a cloud-based administration and relationship management system for schools.

TSI World will also become a UK based reseller of the system.

EdSmart offers its product as a series of modules, so schools only need to adopt the modules that fit with their particular requirements.

The EdSmart School Organisation System (SOS) digitises any manual process or paper-based school administration task, lifting workload burden, saving money, improving customer experience and reducing environmental footprint. It includes broadcast capabilities so email and SMS messages can be sent to teachers, students and parents.

EdSmart operates in schools across nine countries, supporting processes that include:

- Excursions/Incursions
- Annual student record updates
- Enrolments and commencement
- HR and staff management
- OH & S
- Emergency and critical incident communications
- Activities and events
- Scholarship applications
- Surveys and feedback
- Alumni management

TSI World will be marketing and reselling EdSmart modules to UK schools under their SchoolDesktop™ suite under the name SchoolDesktop™ EdSmart™. In addition to reselling the software TSI World will be undertaking first and second line support services for all existing customers in both the UK and the rest of Europe.

Graeme Bower, UK Managing Director commented: "We are delighted to add EdSmart to our portfolio of value added services and solutions for schools and colleges.

"This is such a high quality solution and strongly believe that it will significantly assist our education customers in their day to day operations.

" TSI World continues to forge amazing partnerships with like-minded EdTech companies to enhance and expand our SchoolDesktop™ suite of products and services. "

"We're thrilled to partner with TSI to deliver EdSmart to schools across the EU," said Fiona Boyd, Co-Founder and CEO of EdSmart.

"Customer centricity and integrity are core to our business. TSI shares this emphasis, and has the track record and best-of-breed capability we look for in a partner.

"EdSmart is rapidly becoming the smart choice for smart schools, and we look forward to welcoming new members to our global customer community."

About TSI World

TSI World is a UK company that provides ICT solutions and services for the education sector. These include strategic ICT development, to hardware and software purchasing, telephone support and on-site maintenance and managed services.
