Scotty Cameron Introduces New Phantom X 12.5 Putter

Low-Bend Shaft Setup with New Sight Line Configuration Adds Tour-inspired Option to High-Tech Mallet Family – in Right- and Left-Handed Models

FAIRHAVEN, Mass. (Dec. 3, 2019) – Scotty Cameron has added a new model to the 2019 Phantom X family – the **Phantom X 12.5** – to meet the needs of players seeking a stable mallet with more toe flow and a new alignment option. A left-handed Phantom X 12.5 model also joins the lineup.

Available beginning Dec. 12 in North American golf shops and on Feb. 14, 2020 worldwide, Phantom X 12.5 joins a cohesive Phantom X family that now includes 10 modern mallet designs built around five different head styles. Phantom X 12.5 provides golfers with a new setup option – featuring a **low-bend shaft configuration** and a **tour-inspired single milled sight line** – built around the family’s flagship model, the high-MOI Phantom X 12.

Like every putter in the lineup, the Phantom X 12.5 incorporates Scotty’s tour-inspired, multi-material construction methodology of combining 303 stainless steel and 6061 aircraft-grade aluminum for increased MOI, optimal weight distribution, forgiveness, improved sound and responsive feedback.

QUOTING MASTER PUTTER MAKER SCOTTY CAMERON

“Every time we introduce a new putter line, I receive requests from tour players and dedicated golfers for additional setups and configurations. Phantom X 12.5 is the result of some of those requests. I added the low-bend shaft for extra toe flow and also designed a new alignment option by milling a single sight line down the center painted black for a very clean look from address. It really sets up nicely. Adding this new model also gave me the opportunity to make a left-handed version designed so everyone can take advantage of the performance benefits of the Phantom X 12.5.”

PHANTOM X 12.5 PERFORMANCE AND TECHNOLOGY

- **LOW-BEND SHAFT CONFIGURATION:** The Phantom X 12.5 has a stepless steel shaft with one shaft of offset and a single “low-bend” designed to aim directly down the target line and promote an arc path for more toe flow in the putting stroke.
- **TOUR-INSPIRED ALIGNMENT:** Addressing requests from tour players and dedicated golfers alike, Scotty added a continuous, single center sight line milled from the leading edge to the back of the flange – painted gloss black – offering a new alignment feature for the Phantom X line.
- **LEFT-HANDED MODEL:** Adding a new configuration to the family, the Phantom X 12.5 is also available for left-handed players.
- **MULTI-MATERIAL HEAD WITH SOLID FACE TECHNOLOGY:** The Phantom X 12.5 mallet is constructed with a standard-milled, 6061 aircraft aluminum face anodized black that extends back and through the flange area surrounded by heavier 303 stainless steel wings for high-MOI and stability.

PHANTOM X WEIGHTING & GRIP

New Phantom X 12.5 putters feature the line's **advanced stability weighting** with two, customizable stainless steel heel-toe weights and **stepless steel shafts**, as well as the **Pistolero Plus grip** in cement gray with gloss black paintfill.

FINISH & GRAPHICS

The Phantom X 12.5 model's aircraft grade aluminum components have been anodized black in a misted finish that helps to reduce sun glare. The stainless steel putter head components have also been misted for a radiant yet glare resistant appearance. The single milled sight line, painted gloss black, provides a subtle tone-on-tone visual alignment guide.

AVAILABILITY

Scotty Cameron Phantom X 12.5 putters will be available in North America on December 12, 2019, and worldwide on February 14, 2020 through Titleist authorized golf shops. **MAP \$429.**
