

Dolby Technology Powers Academy Award Nominated Films Including “A Star is Born,” “Black Panther,” and “Roma”

LOS ANGELES, Jan 22, 2019 – Dolby Laboratories congratulates this year’s Academy Award nominees who have tapped into the audio-visual power of Dolby technologies to draw audiences into their stories. Whether through Dolby Vision imaging – providing incredible brightness, contrast, and color, or Dolby Atmos, immersive audio that flows all around you – Dolby technologies bring every theatrical moment to life.

- All five films nominated for Sound Mixing and Sound Editing awards this year were presented in Dolby Atmos.
- Five of the eight Best Picture nominees this year used both Dolby Vision and Dolby Atmos.
- Three of the five Best Animated Film nominations utilized Dolby Vision and Dolby Atmos.
- 2019 will be seventh year the Dolby Theatre has been the home to the Academy Awards.
- Movies with Dolby sound technology have been nominated for Oscars since 1978 (“Star Wars”).

Dolby’s passion for cinematic storytelling enables artists, filmmakers, and studios via science and technology, creating impactful tools for filmmakers around the world. Today Dolby celebrates the following nominees, and their excellence within the craft of the audio and visual arts, who have tapped into the power of Dolby Vision and Dolby Atmos:

Best Picture

- “Black Panther”
- “A Star Is Born”
- “Roma”
- “Bohemian Rhapsody”
- “BlacKkKlansman”
