

Listen all day, your way. Introducing the new

JBL Live headphones

Clearer sound. Smarter noise cancelling. Designed to stand out.

London, 12 May 2026 – JBL announces JBL Live 780NC over-ear and Live 680NC on-ear headphones, built for all-day listening without compromise. Feel every beat with powerful dynamic drivers and advanced noise cancelling, designed to shut out even the smallest distractions. And it's about more than just sound. With smooth metal hinges, refined metallic accents and soft-touch materials, the new JBL Live headphones deliver bold style and lasting comfort. Dropping in a choice of classic and fresh new colours that let you make your mark wherever the day takes you.

Soundtrack your day-to-day

Featuring 40mm dynamic drivers with a compound diaphragm, the new Live headphones bring your playlists and podcasts to life with clearer, more detailed sound. Listen uninterrupted with True Adaptive Noise Cancelling 2.0. Real-time noise filtering and upgraded processing power deliver improved noise reduction, turning down even more distractions than before.

"Our JBL Live headphones strike a perfect balance between great sound and distinctive design", said Carsten Olesen, President of Consumer Audio at HARMAN. "The design changes are clear to see but we have also taken care to improve audio performance with new Hi-Res Audio-enabled drivers, and refined, AI-trained noise cancellation algorithms to deliver more accurate, high-quality experience available at this price point."

Slimmer, lighter, and sleeker

The new JBL Live headphones feature a complete redesign, made to look and feel good all day long. Whether you prefer a bold statement with the new Green, Purple, Blue, and Orange finishes, or neutral tones like Sand, White, or Black, there's a colour to match any vibe.

Fully foldable, with a metal hinge and premium soft-touch materials on the ear cushions and headband, JBL Live lets you listen comfortably, wherever the day takes you.

Working on the move?

Take calls from anywhere with improved call quality. JBL Live features 2-beamforming mics with an enhanced AI-trained noise cancellation algorithm, minimising outside sounds and designed to deliver crystal-clear voice quality. Watching a movie while traveling? JBL Spatial Sound transports you from the daily commute into the world of what you're watching.

Personalised listening without limits

Now compatible with the JBL SMART Tx wireless transmitter*, JBL Live headphones allow even easier access to EQ and music controls, seamless connection to in-flight entertainment, and added personalisation through the touchscreen.

With new customisable button and touch controls, and Personi-Fi 3.0, JBL Live headphones are designed to create a more personalised listening experience that fits you.

JBL Live 780NC and JBL Live 680NC will be available at [jbl.com](https://www.jbl.com) from May for £179.99 / €179.99 and £129.99/€149.99 respectively. Both headphones will launch in Blue, Black, White, Sand, Green, Purple, and Orange.
