

Oaklins

Waste handling equipment to support production lines globally

DEAL NEWS | INDUSTRIAL MACHINERY & COMPONENTS

RÖKO, A SWEDISH INVESTMENT FIRM, MAKES ITS FIRST DANISH ACQUISITION – LUNDBERG TECH, A LEADING DANISH SUPPLIER OF WASTE HANDLING SYSTEMS TO A GLOBAL MARKET.

Röko has a strategy of building a group of independent and strong businesses, with proven capabilities evidenced through good financial performance and leading positions in their respective markets. The acquired companies continue to work independently in a decentralised structure, with support from the Röko team in developing the strategic direction.

Röko now owns 85% of Lundberg Tech and the management team, who are all continuing under the new ownership, owns 15%.

Röko is a Swedish based investment firm with €270 million in committed capital. The ambition is to be a true long-term owner of European small- and medium sized businesses. Röko has a local presence in Sweden, Norway and Germany, and the team has vast experience from working with founder- and entrepreneur led companies across a broad range of industries.

Lundberg Tech develops and manufactures granulators, all-in-one-units

and systems. The offering is designed to convey, cut and collect waste from production processes in industries such as labelling, flexible packaging, food and pharma. Lundberg Tech is a global, profitable niche company headquartered close to Copenhagen in Lille Skensved, and with employees in five countries.

Deal team

Oaklins' team in Denmark was engaged by Röko as strategic and financial advisor.

“Lundberg Tech is a perfect match for us, as we are targeting to invest in niche companies with a proven track-record of profitable growth and attractive margins. The company has a great potential in a growing market, and we are looking forward to supporting the continued development in Lundberg Tech as part of Röko.”

JOHAN BLADH, DEPUTY-CEO – RÖKO
