## **BETTRAI Health Acquires Lifestat Remote Patient Monitoring Solutions**

April 27, 2020 | Fort Worth, Texas

To address the growing need for telehealth and remote patient monitoring, BETTRAI has acquired Lifestat Remote Patient Monitoring Solutions. “BETTRAI’s acquisition of the Lifestat world-class Remote Patient Monitoring Solutions will expand our current portfolio, accelerate time to market, and complete our telemedicine and digital healthcare offerings. We are excited to welcome Venkat Rajaneni and the entire Lifestat organization into the BETTRAI team.”, said Scott Birdwell, BETTRAI CEO. Centers for Medicare & Medicaid Services introduced new reimbursements for more remote patient monitoring services as part of the [telehealth amendments for the 2020 Physician Fee Schedule](#), designed to expand connected health services to improve patient experience and overall population health. With the BETTRAI remote monitoring capabilities, healthcare professionals can offer improved service levels and more cost-effective business models.

Our goal is to help simplify the complexities associated with our current healthcare system, improve the overall patient experience, and increase the effectiveness healthcare providers.

General customer availability for BETTRAI Remote Patient Monitoring is scheduled for July 1, 2020.
