

EXTEL 2017 BROKER SCORECARD

BENELUX

INTRODUCTION

The Extel Broker Scorecard service provides comprehensive results and analysis across rankings for firms and individual analysts or salespersons. Results for your firm or individuals are highlighted, and provided for you in both PDF and Excel formats

This PDF provides a selection of tabular rankings, and graphic views on participation and distribution of votes. Clients can utilize the rankings for their firm and individuals, and any Extel rankings to which they have subscribed, either as part of internal research and assessment, or for external marketing purposes. However, it is not permissible to pass on Extel reports, such as this PDF, to third parties; nor is it permissible to reference Extel in any materials unless you have subscribed to the relevant rankings and detailed results.

This is a unique set of data, giving you a complete view on market sentiment and the leading players, from the perspective of the opinion formers and market practitioners. In all cases the data is weighted, to give the appropriate value to the votes and views of the major asset managers, and corporates. Asset managers views are weighted based on commissions paid, and corporates views weighted based on their average market capitalization – in all cases for the year the data relates to.

Benelux - Leading Brokerage Firm (Based on Commissions Paid)
