

NEWS BRIEF | Textron Aviation to expand European Parts & Distribution Center

DÜSSELDORF, Ger. (April 22, 2026) – Textron Aviation today announced plans to expand its European Distribution Center (EUDC) by 50 percent this year, building on more than a decade of regional support and strengthening parts availability and fulfillment performance for customers across Europe. This expansion reinforces the company's long-term commitment to customer support and continued Aftermarket growth in the region.

Key facts:

- Increases the facility's footprint by approximately 1,000 square meters
- Supports greater parts availability allowing for an estimated increase of 5,000 additional parts and improved fulfillment performance
- Enables continued growth of the local EUDC support team
- Enhances the company's ability to scale operations to meet growing European demand
- Provides faster access to critical parts for customers across the region

About Textron Aviation Parts & Distribution
