Citation Longitude headlines Textron Aviation lineup at NBAA 2015

Textron Aviation Inc., a Textron Inc. (NYSE:TXT) company, is displaying 11 of its commercial business jet and turboprop aircraft at NBAA's 2015 Business Aviation Convention and Exhibition in Las Vegas, including the public debut of the Cessna Citation Longitude super-midsize business jet.

“As evidenced by our extensive lineup at the show, no other aircraft manufacturer offers the broad range of products that we do. We are excited to expand our product offering even further with the new Citation Longitude, which will be a revolution in the super-midsize segment,” said Kriya Shortt, senior vice president, Sales and Marketing. “The Citation Longitude is a perfect example of our commitment to meet our customers’ mission needs through continued product investment.”

Textron Aviation investments on display

In addition to the Citation Longitude, Textron Aviation is showcasing its Cessna Citation Latitude, the company’s newest certified Citation business jet. The Latitude, which received Federal Aviation Administration (FAA) certification in June, is on track to achieve European Aviation Safety Agency (EASA) certification by the end of the year. Throughout the year, three Latitude demonstrator aircraft have been on a worldwide demo tour, traveling to more than 20 countries and stopping at major industry tradeshow.

Rounding out the company’s display of jets are the Citation X+, Citation Sovereign+, Citation XLS+, Citation CJ4, Citation CJ3+ and the Citation M2.

Making its NBAA debut are the Pro Line Fusion-equipped King Air 350i/ER and King Air 250 turboprops, both featuring the recently certified avionics system and new cabin enhancements. In addition, the company will display its King Air C90GTx.

Support driving value

Textron Aviation’s products are supported throughout the entire lifecycle through the most capable and accessible global service network. This week at NBAA, the company’s customer service network is represented through one of its mobile service units (MSU), trucks equipped to perform a variety of maintenance or repair functions when customers prefer service at their own facility. Textron Aviation’s robust international support footprint includes 21 company-owned service centers, nearly 200 authorized turbine service facilities, more than 60 MSUs and three dedicated aircraft for complete, immediate 24/7 response.

About Textron Aviation

We inspire the journey of flight. For more than 90 years, Textron Aviation Inc., a Textron Inc. company, has empowered our collective talent across the Beechcraft, Cessna and Hawker brands to design and deliver the best aviation experience for our customers. With a range that includes everything from business jets, turboprops, and high-performance pistons, to special mission, military trainer and defense products, Textron Aviation has the most versatile and comprehensive aviation product portfolio in the world and a workforce that has produced more than half of all general aviation aircraft worldwide. Customers in more than 170 countries rely on our legendary performance, reliability and versatility, along with our trusted global customer service network, for affordable and flexible flight.
