In addition, the Company will discuss and provide further information with respect to the recent agreement with NetJets to cancel deliveries over several years beginning in 2011. As previously disclosed, the recent cancellation of backlog orders with NetJets is not expected to have any material negative impact on revenue or earnings for 2009 or 2010, and additionally will not have a material impact on the Company’s liquidity in that time frame. Because of the unique nature of the NetJets contracts, the aircraft which would have been delivered to NetJets were not expected to contribute significantly to the Company’s expected earnings in 2011 and beyond.
