## Hawker Beechcraft to Showcase Hawker 200 Mock-Up, Hawker 900XP and King Air 350i at CBAA 2011

**BY TEXTRON AVIATION**

Hawker Beechcraft Corporation (HBC) today announced its participation in the 50th Anniversary Canadian Business Aviation Association (CBAA) convention on July 6-7, 2011, at the Calgary International Airport in Alberta, Canada. HBC will display several of its leading Hawker and Beechcraft products, as well as its Hawker 200 mock-up at Static Display #3.

“Canada continues to be a strong market for our Hawker business jets and we are pleased to be able to showcase our Hawker 900XP and Hawker 200 mock-up at the show this year,” said Richard Emery, president, Americas Jet Sales. “The King Air models are also popular in the region due to their exceptional fuel efficiency and payload/range capabilities needed for the vast intracontinental missions.”

HBC's full scale Hawker 200 interior concept mock-up features an innovative layout that has been optimized for the light jet mission. The mock-up is an impressive display of potential future Hawker styling and an important tool for HBC to gather specific feedback on customer desires in the new Hawker 200 interior. Its high strength, state-of-the-art all-composite fuselage makes the Hawker 200 the most technologically advanced single-pilot business jet in the world.

In addition to the Hawker 200 mock-up, the following products will be on display at CBAA 2011:

**Hawker 900XP**– From the best-selling midsized business jet lineage (the Hawker 800 series), the Hawker 900XP has combined new Honeywell engines with enhanced winglets and a large cabin for increased performance, range, efficiency, comfort and unprecedented value.

**Beechcraft King Air 350i** – The King Air 350i delivers exceptional performance and value. Now equipped with the Rockwell Collins Venue™ cabin management system and state-of-the-art Beechcraft FlexCabin capability, the King Air 350i sets the standard in cabin comfort, business capability, in-flight productivity and entertainment. It delivers unmatched fuel efficiency and the lowest operating cost per seat mile, making it the greenest aircraft in its class. The King Air 350i is the perfect addition to any corporate fleet.

Hawker Beechcraft Corporation is a world-leading manufacturer of business, special mission and trainer aircraft – designing, marketing and supporting aviation products and services for businesses, governments and individuals worldwide. The company's headquarters and major facilities are located in Wichita, Kan., with operations in Salina, Kan.; Little Rock, Ark.; Chester, England, U.K.; and Chihuahua, Mexico.
