## Behind the scenes: Meet the technical experts who created the new CJ4 Gen2

Textron Aviation is committed to innovation and providing customers with the right tools they need at the right time. Recently, Textron Aviation announced the latest upgrades to the Cessna Citation CJ4, ensuring this aircraft remains innovative and legendary for years to come.

The Citation CJ4 Gen2 was built with the customers in mind. Collaboration between the customer advisory board, interiors and engineering created an aircraft with the same reliability and speed, with a more modern, intuitive experience.

*“Everything you see on the Citation CJ4 Gen2 is a direct result of conversations we had with customers.”*

— Jimmy Beeson, a technical marketing manager

Putting the power in the customers hands, passengers will have wireless control of lighting, window shades and cabin temperature. The Citation CJ4 Gen2 features an onboard media server, the ability view moving maps, access to XM Satellite Radio and more innovative interior enhancements.

Hear from the team behind the Citation CJ4 Gen2 on how they turn customer feedback into a legendary product in the video below.
