# Textron Aviation to leverage technology in its return to Sun ‘n Fun 2021

WICHITA, Kan. (March 22, 2021) – Textron Aviation Inc., is returning to the Sun ‘n Fun AeroSpace Expo this year with a transformed digital presence designed to support its customers and the industry, while also showing a commitment to preserving the health and safety of its employees and attendees. The company will be participating in the event, April 13-18, at the Lakeland Linder Regional Airport in Florida, with a modified on-site presence.

Textron Aviation will leverage the use of technology in a return to its first live event since early 2020. Visitors will have the opportunity to view a Cessna Caravan single-engine turboprop at the company’s unmanned booth, and they can also virtually access information on four other aircraft on display through the use of augmented reality. Additional company and product information will be available through the use of video displays, graphic boards and mobile technologies.

## Onsite aircraft display

- Cessna Caravan

## Virtual aircraft display

- Cessna 182 Skylane
- Beechcraft Bonanza G36
- Beechcraft Baron G58
- Cessna Citation M2
