5 Ways to Celebrate STEM Day with Textron Aviation

In order to deliver the best aviation experience for our customers, Textron Aviation is built of diverse talent with different backgrounds and expertise that together, produce world-class aircraft. Celebrating STEM Day brings awareness to the importance of our collective and future talent's specialties in science, technology, engineering and math that assist in the strong problem-solving and innovative skills our company needs to succeed.

Read below for five ways you can continue to develop your STEM knowledge.

1. Learn about why one of our engineers chose aviation

Meet Amber Whittaker-Smith

Like so many others working in the industry, Amber Whittaker didn't set out to be an aerospace engineer. Read how Amber came to love engineering and her path to success.

Women in Engineering Keep our World Moving: Meet Amber Whittaker-Smith

2. Apply for an internship... or job at Textron Aviation!

Exploring your options while in high school? As part of the Youth Employment Project (YEP), Textron Aviation offers students hands-on experience in various careers. Hear from YEP students directly about their experience and apply for the 2022 summer after the new year!

Looking for a full-time career in STEM?

Check out some of these job openings:

Engineer Careers

Manufacturing Careers

Finance and Accounting Careers

Or, see all our current job openings [here](#).

3. Explore a variety of STEM activities from home

Engage with hands-on building activities like a paper roller coaster, foam rocket and popsicle stick catapult for students and educators to create in the classroom or at home.

Each activity introduces essential skills like problem-solving, critical thinking and design.
