TWO CESSNA SKYCOURIER AIRCRAFT ENTER AERO-MEDICAL SERVICE WITH DELIVERY TO TASSILI TRAVAIL AÉRIEN

First SkyCouriers flying in Africa will support medical evacuation missions in Algeria's energy sector

Textron Aviation completes delivery of Africa's first two aero-medical equipped Cessna SkyCourier aircraft to Tassili Travail Aérien, also marking the first SkyCourier deliveries in Africa, expanding the aircraft's special-mission capabilities.

WICHITA, Kan. (Nov. 18, 2026) — Textron Aviation Inc., a Textron Inc. (NYSE: TXT) company, today announced it has delivered two Cessna SkyCourier aircraft equipped for aero-medical missions to Tassili Travail Aérien (TTA) of Algeria. The aircraft are the first aero-medical SkyCouriers in Africa and the first customer SkyCouriers to enter service on the continent, expanding the aircraft's global presence and demonstrating its versatility for critical special missions.

The two aircraft will support TTA's passenger transportation and aero-medical evacuation operations serving Algeria's energy sector. Equipped with the LifePort PLUS Powered Medevac System, the SkyCourier can be quickly reconfigured to support passenger, cargo and medevac missions based on operational needs.

Equipped with the LifePort PLUS Powered Medevac System, the SkyCourier can be quickly reconfigured to support passenger, cargo and medevac missions based on operational needs.

"This is a significant milestone for the Cessna SkyCourier as the first customer for the certified aero-medical system sees their two Cessna SkyCouriers enter service," said Bob Gibbs, vice president, Defense & Special Mission Sales. "The SkyCourier's combination of a large, flexible cabin and mission versatility makes it well suited for operators with demanding transportation and aero-medical requirements. We are proud to see TTA become the first SkyCourier operator in Africa and showcase another important mission for the aircraft."

Based in Algeria, TTA is a subsidiary of Sonatrach, the state-owned national oil and gas company. TTA provides passenger transportation, aero-medical evacuation and other

special mission services to the energy sector across Algeria.

The twin-engine, large-utility Cessna SkyCourier turboprop is expected to modernize TTA's fleet with improved efficiency, reliability and lower operating costs while supporting transportation and medevac missions. The aircraft will be based in Algiers and Hassi Messaoud, Algeria.

Endless Special Missions Possibilities

When government, military and commercial customers need airborne solutions for critical missions, they turn to Textron Aviation. The company's aviation solutions provide the high-performance and flight characteristics required to address the unique challenges of special missions operations. With unparalleled quality, versatility and low operating costs, Textron Aviation products are ideal for air ambulance, intelligence, surveillance and reconnaissance (ISR); utility transport, aerial survey, flight inspection; training and many other special operations.

About the Cessna SkyCourier

The Cessna SkyCourier twin-engine, high-wing turboprop offers a combination of performance and lower operating costs for air freight, commuter and special mission operators. It's available in both freighter and passenger variants, as well as a Combi configuration or with a gravel kit for maximum flexibility. The 19-passenger variant includes separate crew and passenger doors for smooth boarding, a large baggage compartment and large cabin windows for natural light and views.

The freighter variant features a flat-floor cabin that is sized to handle up to three LD3 shipping containers with an impressive 6,000 pounds of payload capability. Both variants offer a large cargo door and single-point pressure refueling to enable faster turnarounds.
